

YULIIA MALTSEVA

JUNIOR FRONT-END DEVELOPER

SUMMARY

I am a motivated and enthusiastic individual who is always looking for new ways to improve my skills and knowledge. My core strengths are my ability to learn quickly and my attention to detail. I am proactive and take the initiative to find solutions to problems. I am also a team player and am willing to help out wherever needed.

PROJECTS

- **ECOSOLUTION Link** [HTML, CSS, JS, REACT, REST API, Swiper]

A sleek website advocating renewable energy solutions. It offers smooth navigation, featuring an infinite slider highlighting real projects and an accordion FAQ section for easy information access. With a fixed header that changes color while scrolling, ECOSOLUTION blends modern design with sustainable energy advocacy.

Role: Developer.

- **PET PALS PORTAL Link** [HTML, CSS, JS, REACT, REST API, Redux, WebPack]

A website with a responsive layout. Find a pet by searching in different categories, see the detailed information about the pet. Search for news related to animals. Read about the site's partners and their contact information. Register to be able to add and remove your ads, add animals to favorites. Verify your email. View and edit your profile, add your pets. Use the website on different devices.

Role: Scrum master. Developer.

- **NEWS NEST Link** [HTML, SASS, JS, REST API, AJAX, Parcel]

A news site where you can read popular news, news by category, and search for news by keyword. Readed news are saved on the read page. It is also possible to add/remove favorite new and view them on the Favorites page. Deploy project on Parcel.

Role: Developer. Implemented adding/removing favorites news, implemented searching for news by keyword on Favorite page and Read page.

- **CONTACTS KEEPER Link** [HTML, CSS, JS, REACT, REST API, AJAX, WebPack]

This project is a phone book application with a responsive layout built using React and Redux. It allows users to register, log in, and manage their contacts.

Role: Developer.

- **COMMENT CAST Link** [REACT-NATIVE, FIREBASE, REDUX]

This is a mobile app that allows users to navigate through different screens based on their authentication status. The app demonstrates the use of React Navigation for implementing navigation flows and Redux for managing application state. Users can view a list of posts, including information such as post images, names, number of comments, and number of likes. They can also view comments for specific posts and add their own comments and view on the map the location where the photo was taken.

Role: Developer.
